EDUCATION

University at Buffalo, State University of New York Expected Graduation: **December 2025**
Masters of Science, Computer Science Buffalo, NY

Relevant coursework: Data Structures, Algorithms, Software Engineering, Deep Learning

Sinhgad Institute Of Technology August 2017 – May 2021
Bachelor of Engineering, Computer Science Pune, India

TECHNICAL SKILLS

Proficient: Python, Golang, Javascript, Dart, C++; MySQL, MongoDB, PostgreSQL; Git, React, NodeJS, Flask, Linux, Neovim **Familiar:** Typescript, PHP, Rust, C, Lua; BigQuery, Redis; Apache Kafka, Grafana, Nginx, GitOps, Debezium **Cloud Frameworks:** AWS (production-level), GCP (production-level), Azure, Kubernetes, Docker, GitOps, Apache Kafka **Web Frameworks:** React, NodeJS, Flask, Spring Boot, Laravel, Astro, Nginx

EXPERIENCE

Software Development Engineer 2 August 2021 – July 2024
Freightify | Golang, NodeJS, MongoDB, AWS, React Chennai, India

- Scaled multiple products to support **over 50,000 users**, managing over **1,000+ requests per second**
- Modernized infrastructure by transitioning from traditional AWS EC2 to **Kubernetes** and GCP, reducing deployment time by **50%** (from **1 hour to 30 minutes**) with **bi-weekly deployments**
- Improving scalability, and reducing operational costs by approximately **30%** annually through automated container orchestration and delivering systems with **99.5%** uptime using **gRPC**, Golang and NodeJS microservices
- Developed applications using MERN stack and built internal tools that **improved operational efficiency by 30%**, streamlining workflows and reducing turnaround time for product updates by **25%**
- Implemented robust **ETL pipelines** using **distributed systems** like **Kafka** to stream **over 10 gigabytes of data daily**, visualizing changes using **Grafana**, identifying performance bottlenecks to reduce downtime by **25%**

Software Engineering Intern October 2019 – December 2019
Occipital Tech | React Native, Java, Python Mumbai, India

- Engineered an Android/iOS application to empower **over 5,000 farmers** in identifying and grading commodity samples, real-time analysis of features using **OpenCV** increasing accuracy by **20%**
- Designed an intuitive user interface that **increased user engagement by 30%** and streamlined the grading process, resulting in **higher adoption rates** within farming communities and improving operational efficiency

Software Engineering Intern August 2018 – March 2019
Freightbro Logistics | Laravel, Swift, Kotlin, Dart Mumbai, India

- Developed a logistics management Android app using Flutter, incorporating RxDart for **efficient state management** and **reactive programming** with client-side caching
- Implemented real-time shipment tracking, order management, and notification systems
- Streamlined authentication processes and deployment workflows using Firestore and **CircleCI**, reducing deployment time by **45%** and improving overall app management efficiency

PROJECTS

Lyrik | Flutter, NodeJS, Firebase | [Play Store Link](#) December 2019 – Present

- Engineered the Lyrik Android app, enabling users to search, view, and save song lyrics across various music genres. Implemented **offline** functionality using **SQLite** for seamless access without internet connectivity.
- Over **50,000+** downloads on the Google Play Store with a **4.8-star** rating on the Google Play Store within three months of launch.

Speech Emotion Detection | Python, PyTorch, scikit-learn, CNN Decemeber 2020 – May 2021

- Utilized **LSTM and CNN** models to predict speech emotional states and classify them into six categories.
- Preprocessed raw audio data by extracting relevant features such as MFCC, pitch, and spectral contrast.
- Deployed the model on a website for practical emotion detection using real-time audio.
